

A match is a tool.

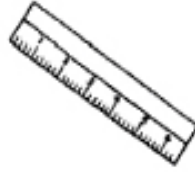

1. Here are some tools. Circle the safer tools for children. Put an "X" on tools that are not safe for children. Say why they are not safe.

crayon

knife

ruler

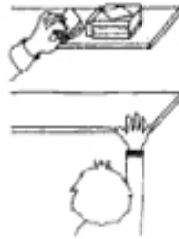

match

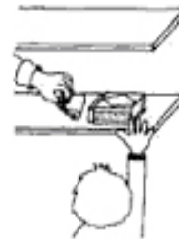

scissors

2. Where should your parents store matches? Color the safer place. Put an "X" on the unsafe place.

out of reach

in reach

3. Who should help you practice using matches? Color the correct answer. Put an "X" on the wrong answer.

other kids

grownups

4. What happens when you play with matches? Write yes or no.

Matches can start a fire.

Fire can burn your skin.

Burns can give you scars that never go away.

Burns can hurt for many years.

I will use matches *only* if grownups are there to help.
